

BRAND GUIDELINES + UI/UX REDESIGN

A complete identity and product-interface direction
for Nigeria's buyer-seller marketplace.

Version 1.0 - Aug 2026

The rebrand in one page

The approved logo becomes the anchor for a cleaner, safer and more scalable

1

Positioning

A modern Nigerian marketplace that makes buying, selling, payment and delivery feel coordinated.

2

Core promise

Buy smart. Sell easy. Trade with confidence.

3

Personality

Helpful, direct, optimistic, secure and locally relevant.

4

Design idea

A friendly smile signals ease; forest green signals trust.

What the current product already contains

Buyer journey

Browse products, pay through Flutterwave, message sellers, track orders and access buyer protection.

arer,

Seller workspace

Products, orders, analytics, coupons, reviews, payouts, ads, sourcing and store settings.

Trust layer

Seller verification, KYC, buyer reviews, support, dispute handling and BUYSELL-managed delivery.

Admin operations

User activity, KYC review, marketplace health, payouts, disputes, broadcasts and platform branding.

Key opportunities identified

- Unify the landing page, marketplace and dashboards
- Reduce feature density with stronger hierarchy
- Make trust and delivery visible at decision points
- Create reusable tokens and components for future screens

Moodboard and UI direction

User-provided UI inspiration + Pinterest marketplace research.

Purpose, promise and values

PURPOSE

Make trusted online trade simpler for everyday buyers, independent sellers and growing Nigerian businesses.

BRAND PROMISE

Every transaction should feel clear, protected and easy to follow from discovery to delivery.

1

Trust

Show verification, payment and delivery status clearly.

2

Simplicity

Use direct language, progressive disclosure and obvious actions.

3

Growth

Help sellers build sustainable stores and reach buyers.

4

Local relevance

Design around Nigerian payment, delivery and commerce behaviour.

Primary wordmark

The primary wordmark logo for 'buySell' is displayed on a black rounded rectangle. The word 'buy' is in white, and 'sell' is in green. A green smile curve is positioned under the 'y' in 'buy' and the 'l' in 'sell', connecting them.

Logo construction

Base typeface: Comfortaa Bold. The production logo is a vector-path recreation with optical spacing and a custom smile curve.

Concept

White “buy” communicates clarity. Green “sell” communicates growth. The smile links both sides of the marketplace.

Approved colour variants

Clearspace and minimum size

Clearspace

Keep clearspace equal to the cap height of the "b" around every side of the wordmark.

Minimum size

buysell

Digital: 96 px wide minimum

INTERFACE FAMILY

Inter Display

Inter for body copy and controls

Regular The quick brown fox 012345

Medium The quick brown fox 012345

Semibold The quick brown fox 012345

Bold The quick brown fox 012345

Shapes, imagery and iconography

Smile curves

Use as subtle crops, motion paths and dividers.

Icon style

Use simple rounded line icons at 1.5-2 px with forest-green strokes. Keep labels short and action-focused.

P

D

V

C

S

Product-first

Clean backgrounds, true colours and consistent angles.

Human when useful

Use real buyers and sellers to communicate trust and local relevance.

Contrast

Pair light product grids with dark green campaign moments.

No clutter

Avoid overfilled banners and unrelated decorative effects.

How BUYSELL should sound

FRIENDLY

TRUSTWORTHY

DIRECT

HELPFUL

Write like a capable marketplace guide: clear enough for first-time buyers, confident enough for established sellers, and never robotic.

HERO HEADLINE

Buy smart. Sell easy.

TRUST MESSAGE

Your payment is confirmed before collection begins.

SELLER CTA

Open your store and start listing.

DELIVERY STATUS

Collected from seller. On the way to you.

ERROR STATE

We could not complete that payment. Your cart is still safe.

Interface principles

1

Search first

The marketplace search remains visible and useful across browsing flows.

2

Trust in context

Verification, payment and delivery appear beside the action they support.

3

Progressive disclosure

Secondary seller and admin tools live inside structured workspaces.

4

Mobile priority

Cards, navigation and checkout controls remain thumb-friendly.

5

Consistent states

Success, warning, pending and failed states use predictable labels and colour.

6

Seller growth

Analytics and actions focus on what sellers should do next.

Revamped marketplace homepage

A focused search-led homepage combines product discovery, category browsing and visible trust signals.

Marketplace listing and filters

A structured grid replaces visual noise with useful filters, verified-listing cues and consistent product cards.

Product detail and seller trust

The purchasing decision keeps product information, seller verification, reviews, payment and delivery confidence together.

Seller dashboard

A clearer command centre prioritises revenue, orders, inventory, payouts and quick next actions.

Checkout and BUYSELL delivery

The flow explains who handles payment, collection and tracking before the buyer commits.

buysell

Search products, brands, stores...

BUYSELL Brand System - 2026

18

Mobile marketplace experience

The same brand system is compressed into fast, thumb-friendly discovery and product-detail flows.

Marketplace home

Product detail

Brand mockup direction

The logo remains strongest on black and deep-green surfaces, supported by white space and restrained green accents.

Logo and interface rules

DO

- Use the primary wordmark on black, deep green or white.
- Keep enough clearspace around the smile and letterforms.
- Use forest green for trust and action, not every surface.
- Keep product imagery clean, consistent and truthful.
- Use short, specific labels for status and actions.

DON'T

- Stretch, rotate or rebuild the logo with another typeface.
- Use the green wordmark on low-contrast photography.
- Overload screens with every seller feature at once.
- Hide payment, delivery or seller-verification information.
- Use yellow as a primary brand colour; reserve it for offers.

Ownership note

This is a clean vector recreation of the approved visual concept. Final trademark clearance and legal registration should be completed before large-scale rollout.

What is included

Brand PDF

- 23-page guideline and redesign document
- Strategy, logo, colour, type and messaging
- Current-site audit and UI recommendations

Logo files

- 10 PNG variants
- 10 editable SVG vector variants
- Primary, reverse, monochrome and app icon

UI screens

- 5 desktop concepts
- 2 mobile concepts
- Marketplace, seller and checkout flows

Technical tokens

- CSS variables
- JSON colour and typography tokens
- Usage README and source notes

Ready for logo refinement, website prototyping and development handoff.
